

PERSONALISE YOUR WORKSHOP

RSC 55

REVOLUTIONISE YOUR SPACE

SAVING TIME AND COSTS

We will fabricate soft thermoformed trays to your approved design which will hold all your chosen tools. Made from two colour foam, design takes 4-8 weeks depending on the project.

REDUCING ACCIDENTS

Many accidents can be prevented by having the right tools available at the right time for servicing and maintenance. Efficient tool management is vital to provide effective servicing and maintenance.

IMPROVED SERVICE LEVELS

Standard tool kits do not always fit your needs. Create your own bespoke tool kit piece by piece for increased flexibility, thereby increasing the quality and performance of your work.

OUR SIMPLE & ECONOMIC PROCESS

ESTABLISH YOUR NEEDS

With the help of our specialist staff and demonstration units you will define your tool requirements.

PRODUCTION

We will fabricate soft thermoformed trays to your approved design which will hold all your chosen tools. Made from two colour foam, design takes 4-8 weeks depending on the project.

SPECIALIST DESIGN

Our in-house experts will optimize the space available in each storage unit. The finished design will be submitted to you for approval.

COST CONTROL

Our design and manufacturing process allows us to control costs and standardise systems. The contents can be modified according to your budget.

BASED ON THE 5S CONCEPT

Since its development in the 1960s in Japan the 5S concept has been widely adopted by organisations wanting continuous improvement across many departments and industries.

1

SORT

Identify and select only what you need.

2

SET

Organise a bespoke layout unique to you.

3

SHINE

Maintain a clean and tidy, well managed workspace.

4

STANDARD

Standardise a solution for each job specification.

5

SUSTAIN

Sustain a regulated and disciplined tool management system.
